C21N: initial opposing matter/radiation stress, zero initial shear
Existing 4 of 125 trajectories; circles = saved data, dashes = local coefficients; no new ODE
Saved signed shear and actual local jet
$P_{m,0} = -2 \times 10^{-4}$
$P_{m,0} = -1 \times 10^{-4}$
$P_{m,0} = +1 \times 10^{-4}$
$P_{m,0} = +2 \times 10^{-4}$
$S = \sqrt{6}\,s/H_t\ (10^{-6})$
$\eta = \ln(a/a_0)$
Measured residual at existing saved times
$S_{\rm saved} - [S_0'\eta + \frac{1}{2}S_0''\eta^2]\ (10^{-9})$
η
Local quadratic response; zero excluded
$S_{\rm saved}/\eta^2\ (10^{-5})$
$\eta > 0$
