Tensor cancellation is not addition of scalar norms
Actual tiny initial floating-point offsets are retained
Initially $P_m = +5 \times 10^{-4},\ P_r = -5 \times 10^{-4}$
Signed full stress coordinate
P_m
P_r
P_{tot}
Redshift z (time advances to the right)
Shear generated from S0 = 0
1e−5
Signed $S_F = \sqrt{6}s/H$
Pm0 > 0
Pm0 < 0
Redshift z (time advances to the right)
$1 - |P_m + P_r|/(|P_m| + |P_r|)$
Cancellation fraction
Pm0 > 0
Pm0 < 0
Redshift z (time advances to the right)
Separate radiation sectors (Pm0 > 0 case)
Signed full stress coordinate
CMB photons
Massless neutrinos
Redshift z (time advances to the right)
